ACCELERATING THE BENEFITS OF ACI

HighPoint make it easier for organisations to realise the benefits of ACI and leverage the value of their technology investment quicker. Halve your deployment time whilst eliminating the risks of implementation.

WHAT SLOWS CUSTOMERS DOWN

Expertise & Experience
For the IT teams in many organisations, this is their first experience of ACI, for them it is an uncharted territory and they are rightly nervous.

Risk of Disruption
Migrating data centre fabric has an impact on every critical application running across that fabric and poses significant risk.

Extended ROI Timescales
The above factors combined with technical complexities often means that ACI projects span many years and fail to meet ROI target timescales.

HOW HIGHPOINT HELPS

Full Depth Visibility of Infrastructure
We provide bespoke tooling to aggregate multiple data sources to perform comprehensive network analysis enabling accurate and thorough migration planning.

Automation of Configuration
We reduce the time required and the human risk by automating the configuration required to convert current state to ACI network centric mode.

Shorten Deployment Timeframes
On average we halve the end-to-end timeframes to migrate to ACI through the benefit of our proven methodology and bespoke tooling

Mitigate Migration Risk
Leveraging automation for discovery, configuration and testing tasks, mitigating risk and allowing for increased amount of change windows.

OUR PROVEN SUCCESS WITH CISCO

Our approach is not just proven on small single DC projects, but also the largest

Supported a Major Global Bank HQ'ed in UK to migrate its world-wide infrastructure to Cisco ACI

3 Regions
4 Time Zones

13 Global Data Centre
Over 120,000 ports

HighPoint played a significant role in engaging strategically with the Bank and not only accelerating the deal for Cisco but accelerating time to value for the Bank.
